

To Whom It May Concern

20th Jan 2022

Dear Sir / Mdm,

Recommendation Letter for LOO Chee Kean

It is my great pleasure to recommend Loo Chee Kean to go for NUS Overseas College. I have been Chee Kean and his team's mentor for their start-up BoviTech since April 2021. BoviTech specializes in livestock identification using Artificial Intelligence.

Chee Kean is a highly motivated and dedicated individual. He has been constantly looking for different ways to improve his start-up's technology. This allows him to be equipped with valuable knowledge and skills in the field of Artificial Intelligence. He did his own research on mobile development and deep learning to make his start-up's technology more robust and deployable. He has been reaching out to me and asking for my advice whenever he encounter some challenges.

I am very impressed by Chee Kean's initiative in contacting different farms and his field work in collecting more data. He has been very open to my suggestions on various technical aspects before deploying their technology on a larger scale.

Despite being a computer science student, Chee Kean is willing to explore fields outside of his current curriculum. He has demonstrated excellence in all that he puts his mind to, whether it is working in a team, outreach or advancing the technology. NOC will be an excellent learning opportunity for this energetic young man. I would strongly recommend Chee Kean as I believe he is the right fit for the type of innovative and entrepreneurial students that NOC is trying to groom.

Sincerely,

NG Teck Khim
Associate Professor
School of Computing, NUS
